

We are excited to announce a significant upgrade to our trading environment on the MetaTrader 5 (MT5) platform: the introduction of Tiered Leverage based on trading volume (lots).

This enhancement is part of our continuous effort to offer a more stable, secure, and performance-optimized trading infrastructure, aligning with global standards and best risk management practices.

What is Tiered Leverage (Lot-Based)?

Tiered Leverage is a dynamic system where the maximum available leverage decreases progressively as your total open position size (in lots) increases. This allows for more responsible risk exposure as trading volume scales, particularly during periods of market volatility or high liquidity usage.

Symbols	Tiers based on Lots	Leverage
Gold 	0-1 1-8 8-50 Above 50	1:500 1:200 1:100 1:50
Silver 	0-1 1-5 5-10 10-20 Above 20	1:100 1:50 1:25 1:10 1:5
Forex 	0-10 10-50 50-100 100-200 Above 200	1:1000 1:500 1:200 1:100 1:50
Index 	0-20 20- 400 400-1000 1000-2000 2000-3000 Above 3000	1:200 1:100 1:50 1:20 1:10 1:5

Symbols	Tiers based on Lots	Leverage
Futures 	0-10 10-20 20-30 Above 30	1:50 1:25 1:10 1:5
Oil 	0-3 3-50 50-100 100-150 Above 150	1:50 1:25 1:10 1:5 1:2.5
BTCUSD 	0-2 2-5 5-20 Above 20	1:20 1:10 1:5 1:2
ETHUSD 	0-2 2-5 5-20 Above 20	1:20 1:10 1:5 1:2

What is Tiered Leverage (Lot-Based)?

Risk Optimization: Automatically reduces leverage on larger position sizes to prevent overexposure.

Professional Trading Environment: Brings leverage in line with institutional-grade risk models.

Regulatory Alignment: Meets evolving global standards for responsible trading practices.

Increased Capital Efficiency: Enables traders to better manage their margin and overall portfolio risk.

What is Tiered Leverage (Lot-Based)?

This new system will be automatically applied to all MT5 accounts.

Leverage will adjust dynamically in real time based on your total open position size per instrument group.

Margin requirements may increase as trade size grows—plan your strategies accordingly
